## **Role: Fertility Consultant/Specialist (Part/Full-time)**

We have an exciting opportunity for an experienced and approachable Fertility Specialist to join our friendly team.

The Fertility & Gynaecology Academy is a progressive HFEA licenced assisted conception centre in central London, committed to providing excellent individualised, patient-focused care since 2005.

We are equipped with the latest technology and endeavour to provide the very highest level of care to a diverse range of patients. We treat those with uncomplicated IVF as well as those with recurrent IVF failure, and recurrent miscarriage. We are renowned worldwide for having the most comprehensive reproductive immunology programme.

You will be required to work 4-10 sessions a week at the clinic on Wimpole Street (W1), covering all aspects of fertility investigation and treatment.

Salary is based on experience and benefits can be discussed.

For an initial informal discussion please contact Dr Gorgy on 020 7224 1880.

### **The responsibilities of the Fertility Specialist:**

- Planning, managing and undertaking the care of new and existing patients throughout their entire fertility journey with us. This includes investigations such as ultrasounds and saline hystero-graphy, diagnosing causes of infertility, developing treatment plans and implementing fertility treatments, including (but not limited to) IVF, ICSI, and PICSI.
- There is no one size fits all treatment and as such, you must be confident in developing personalised treatment plans for each patient as is appropriate to their individual circumstances.
- To provide comprehensive care in line with our protocols and high standards.
- Maintaining clear and accurate patient records.
- Honest communication with our patients and The Fertility & Gynaecology Academy team.
- The experience our patients get is of the utmost importance to us and as such, you must be comfortable building positive relationships with patients.

**Experience:**

- Minimum of 2 years experience in assisted conception.
- You will be conversant with the HFEA code of practice, CQC and regulatory bodies policies and standards.
- You will have good time management skills.
- You will have attention to detail and accuracy.
